EYE LIGHT

From \$US 400

Often a combination of lifestyle, hormones and depleting collagen, most of us combat dark circles through our lives. Eye Light, a painless intra-dermal delivery system induces collagen and elastin production. It also improves skin texture and appearances of fine lines and wrinkles. An all new treatment that promises great results.

HOW IT WORKS

With peptides complex, GF complex, and botanical stem extracts, minimally -invasive therapeutic treatment for dark circles and wrinkles.

BENEFITS OF EYE LIGHT

With our versatile treatment, you can tackle

- Reduction of Dark Circles
- Reduction of Fine Lines and Wrinkles In The Under Eye Area
- Relief from eye bags and puffiness
- Better skin texture
- Reduction In Appearance Of Pores

HIGHLIGHTS

- Session Duration: 30-45 min + Facial treatment 60min.
- Anesthetic: Yes
- Full Recovery: Immediate
- Result: Instant

BOTOX

BOTULAX POLVO LIOFILIZADO product

Doctor Medical Spa offers BOTOX Cosmetic injectable treatment for patients interested in reducing the appearance of the visible effects of age. BOTOX® Cosmetic is a neuromodulator that temporarily relaxes the facial muscles in the designated treatment area to treat dynamic wrinkles like frown lines, crow's feet, and smile lines. If you are looking to restore a younger-looking appearance without undergoing an extensive surgical procedure, BOTOX Cosmetic might be the right choice for you!

WHAT IS BOTOX® COSMETIC?

BOTOX® Cosmetic is an injectable aesthetic treatment comprised of botulinum toxin, a neuromodulator, that can be used to soften and smooth fine lines and dynamic wrinkles that have formed as a result of repeated muscle contraction. BOTOX® works by temporarily relaxing the facial muscles in the treated area and preventing them from contracting, which reduces the appearance of dynamic wrinkles and restores a younger-looking, refreshed appearance.

BENEFITS OF BOTOX® COSMETIC:

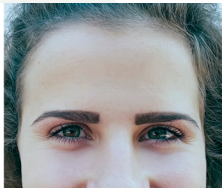

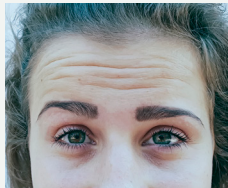

- High patient satisfaction
- Quick treatment sessions
- Customizable treatment plans
- Little to no downtime
- Minimally-invasive

WHAT CAN I EXPECT DURING AN INJECTION SESSION?

Treatment sessions typically last between 15 and 20 minutes + 60min facial

WHEN WILL I SEE RESULTS?

Many patients begin to see an improvement in the treated area within 24 to 48 hours of an injection session. The full effects of BOTOX® Cosmetic will continue to develop and become visible within two to three weeks of an injection session, and some patients may experience continued improvement in the treated area for up to a month after their BOTOX® injections.

ARE THERE ANY SIDE EFFECTS?

Some patients may experience some mild, injection-related side effects, including tenderness, itching, and bruising, swelling, and/or localized discomfort at the injection site. These side effects are temporary and generally subside on their own within a week of an injection session.

Forehead lines – Female (Frontalis)	From \$385

INJECTABLE HYALURONIC ACID

From \$US 600

ALIAXIN product

WHAT IS INJECTABLE HYALURONIC ACID?

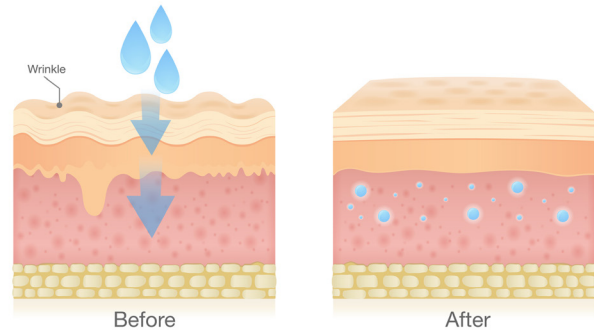

Injectable hyaluronic acid (HA) is a type of temporary dermal filler. Hyaluronic acid is found naturally through out the body, with the highest concentrations in the joints, eyes, and skin. In the skin hyaluronic acid attracts water, which allows the skin to become more hydrated. As we age, the fat, muscles, bone, and skin in our face begins to thin. This loss of volume leads to either a sunken or sagging appearance of the face, fine lines, wrinkles, folds, and thin lips. Injectable HA is used to reduce the appearance of fine lines and wrinkles, facial folds, and to create structure, framework, and volume to the face and lips. The effects of injectable hyaluronic acid are seen immediately.

WHEN IS INJECTABLE HYALURONIC ACID APPROPRIATE?

HA dermal fillers have been used for:

- Wrinkles
- Nasolabial folds
- Marionette lines
- Pre-jowl sulcus
- Lips
- Fine lines around the mouth
- Under the eyes
- Cheek augmentation

UNDERARMS / PALMS
\$US 1500**

PROFHILO TREATMENT

Profhilo is an injectable anti-ageing treatment containing slow release Hyaluronic Acid (HA) that is formulated to increase the volume and elasticity in the skin. The treatment also helps to stimulate collagen and elastin production which in turn improve skin tone, hydration and the appearance of fine lines.

WHAT ARE THE BENEFITS OF PROFHILO?

Profhilo helps to improve skin tone, texture, hydration and overall radiance. Hence, you will see your skin having more firmness and elasticity.

HOW IS PROFHILO USED?

Due to its deep hydration capability and its ability to boost collagen and elastin levels, Profhilo can be injected to the lower face and neck for:

- Lifting and firming sagging skin.
- Smoothing fine lines and wrinkles.
- Hydrating dull, aged, and dry skin to achieve healthier looking skin.

HOW LONG DOES THE RESULT LASTS?

The result usually lasts up 6 to 12 months.

HOW LONG DOES IT TAKES TO SEE THE RESULT?

The effect usually takes place within 3-5 days of treatment.

IS THE TREATMENT PAINFUL?

The treatment is usually quite painless as numbing cream will be applied to the treatment area before the treatment starts.

IS THERE ANY RISK IN DOING PROFHILO?

Profhilo is free of chemical cross-linking compounds traditionally needed to stabilise HA. Hence, it minimises any potential hypersensitive reaction to the Profhilo treatment.

HOW DOES IT WORK?

The treatment requires a unique application technique where Profhilo is injected to specific points on the face and neck to achieve the desired result. This technique avoids areas with large blood vessels or nerve branches, minimising the chance of bruising.

It can also be combined with other synergistic treatments like Ultherapy, rejuvenating lasers , and dermal fillers to enhance the volumising and lifting effect, as well as improve skin tone and texture.

WHAT ARE THE POST TREATMENT CARE?

As Profhilo is a minimally invasive, no downtime treatment, minimal post treatment care is required.

IS THERE ANY DOWNTIME?

The downtime is usually minimal, and normal daily activities can be resumed immediately after the procedure.

However, it is recommended to avoid strenuous activities and exercise on the first day after the treatment.

IS THERE ANY SIDE EFFECTS?

Like any aesthetic treatments, there is a risk of side-effects, such as minor bruising or swelling at the injected areas. These will generally subside quickly in the next few days.

CAN I DO PROFHILO IF I AM PREGNANT?

Profhilo is not recommended for women who are pregnant or breastfeeding, or allergic to Hyaluronic Acid.

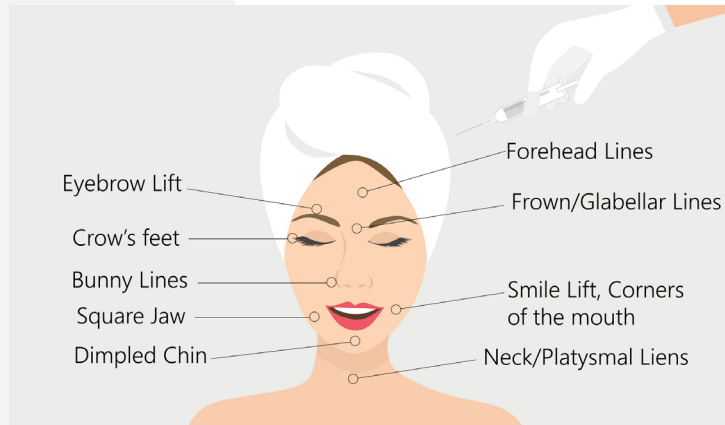

ARE PROFHILO AND FILLERS THE SAME?

While both treatments contain Hyaluronic Acid, as compare to dermal fillers, Profhilo doesn't add volume or change the structure of the face. Instead, Profhilo acts more like an intense moisturiser to hydrate the skin and make it supple.

HOW MUCH IS PROFHILO TREATMENT?

The treatment cost **\$US 889** for 1 session.

5 BIO AESTHETIC POINTS (BAP)

Profilo created the Bio Aesthetic Point (BAP) application technique for the lower face and neck. The BAP injection sites carefully chosen as there are no nerve branches or big blood arteries. These points have been chosen with care to guarantee that

- Improved spreadability of the HA acid over the whole treatment area
- Reduce the risk of bruising by avoiding big blood vessels.

There are a total of 10 BAP injections for the face (5 points on each side)

There are ten BAP sites for injections in the neck.

Profilo is safe due to its low injection sites (reducing risks of bruising and pain). Because of its short downtime, this therapy is ideal for people who are often on the go.
